-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7, 9, 10, 12-19, 21-24, 26, 28, 29, and 31-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Blackstock et al (US 3689290).

Blackstock et al teach a cheese substitute and process for preparing comprising a bland edible particulate, a vegetable fat component, a salt component, and parmesan flavor as is claimed (see entire patent, especially column 2, lines 6-61 and Examples 1 and 2).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6, 8, 11, 25, 27, and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blackstock et al (US 3689290) in view of JP 03067544 and GB 1601672.

Blackstock et al is cited as above.

The claims differ as to the specific use of soy flour and palm oil.

JP 03067544 discloses the conventional use of soy in the flour form for the production of a cheese-type product (see abstract).

GB 1601672 discloses the conventional use of palm oil in the production of cheese-type product (see entire document, especially page 3, lines 52-61).

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use flour as taught by JP 03067544 and to use palm oil as taught by GB 1601672 in that of Blackstock et al because the use of flour as a source of soy and the use of palm oil is conventional in the simulated cheese art.

Applicant is using known components for their art-recognized function to obtain no more than expected results.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leslie Wong whose telephone number is 571-272-1411. The examiner can normally be reached on Tuesday-Friday.
